CHAPTER 4

Home Sweet Home

🎯 **In this chapter I will learn:**

- say why we need a house
- know animal homes
- tell pucca and kutcha houses and their parts
- know what makes a healthy house
- follow safety rules at home

Why do we need a house?

A house is a place where a family lives together. It has rooms: bedroom, living room, kitchen, washroom. A house keeps us safe from…

heat and cold	rain and storm	thieves	wild animals	germs and diseases
☀️❄️	🌧️🌧️	🚪	🐅	🦠

Animals need homes too

Animal	Home
🐕 Dog	kennel
🐄 Cow	shed
🐦 Bird	nest
🐟 Fish	pond / water
🐝 Bee	beehive
🐒 Monkey	tree

Types of houses

	Pucca house	Kutcha house

Made of	cement, bricks, iron, steel, concrete, wood	wood, straw, bamboo, mud, dry leaves
Strong?	strong and long-lasting	not very strong
Examples	multi-storey building, bungalow	mud hut

Many people build our houses: **mason**, **carpenter**, **plumber**, **electrician**, **painter**. We should respect them.

Parts of a house

Part	Job
Doors	we enter the house through the main door
Windows	bring in sunlight and fresh air
Roof	covers the top; **flat** in hot places, **sloping** in rainy/snowy places so water drains off
Floor	bottom surface of a room
Walls	enclose rooms; support pipes and wires
Grills	steel or iron guards on windows

A healthy house

Free from flies, mosquitoes and rats · many doors and windows for sunlight and air · proper drainage · two dustbins (dry and wet waste) · things kept in place.

Safety in the house

⭐ **Remember** Ask an elder before using scissors, knives or blades. Stay away from the gas stove, fire and matchsticks. Do not touch electric things with wet hands. Take medicine only from parents. Do not jump on beds. Be careful on the balcony. If someone makes you uneasy, walk away and tell a trusted grown-up.

🔤 Word Master

Word	Meaning

kennel	a dog's house
germs	tiny living things that make us sick
drain off	flow away
enclose	surround
concrete	stone and cement mix

Exercise 4.1: Fill in the blanks

Use: flat, door, kutcha, clean.

1. The two types of houses are _____ and pucca.
2. We enter the house through the main _____.
3. Hot places have houses with _____ roofs.
4. A _____ house keeps us disease-free.

Exercise 4.2: Choose the correct option

1. Not used to make a kutcha house: mud / steel / straw
2. Not found in a house: wall / market / floor
3. A good house has: dustbin / covered drains / both

Exercise 4.3: Unsafe or safe?

Write U or S.

1. Playing with matchsticks
2. Asking an elder to use scissors
3. Touching a switch with wet hands
4. Taking medicine from parents

Exercise 4.4: Answer the questions

1. Name three things used to build a kutcha house.
2. Why do some houses have sloping roofs?
3. Give two features of a healthy house.
4. One difference between kutcha and pucca house.

💭 **Think:** If there were no water and electricity for a day, what difficulties would you face? (no fan, light, cooking, bathing…)

🔑 Answer key – Chapter 4: Home Sweet Home

Exercise 4.1: Fill in the blanks

1. kutcha • **2.** door • **3.** flat • **4.** clean

Exercise 4.2: Choose the correct option

1. steel • **2.** market • **3.** both

Exercise 4.3: Unsafe or safe?

1. U • **2.** S • **3.** U • **4.** S

Exercise 4.4: Answer the questions

1. mud, straw, bamboo • **2.** so rain water or snow can drain off • **3.** clean, free of pests, windows for air and light • **4.** pucca is strong (cement, bricks); kutcha is weak (mud, straw)
