Chapter 15: Our Universe

Simple stories · pictures in words · activities · answer keys

CHAPTER 15

Our Universe

🎯 **In this chapter I will learn:**

- name things in the sky
- know phases of the Moon and the rainbow
- know the Sun and the planets
- know landforms of the Earth
- keep the Earth pollution-free

Things in the sky

The sky looks different by day and by night. We see the **Sun**, **Moon**, **stars** and **clouds**.

	Facts
🌙 Moon	seen at night; its shape keeps changing. **Full moon** – like a ball. **New moon** – cannot be seen. Astronauts reach it in a spaceship launched by a rocket.
☁️ Clouds	look like cotton balls; float; dark clouds bring rain
🌈 Rainbow	seven colours after rain: **violet, indigo, blue, green, yellow, orange, red**
⭐ Stars	twinkle at night; very big but look small because they are far; too many to count
☀️ Sun	a star close to us; a big ball of fire; gives heat and light; all living things need it

The Sun and the **eight planets** make the **Solar System**.

1	2	3	4	5	6	7	8
Mercury	Venus	Earth	Mars	Jupiter	Saturn	Uranus	Neptune

Mercury is the nearest planet to the Sun, Neptune the farthest, and Saturn has rings. Remember: *My Very Educated Mother Just Served Us Noodles.*

Our Earth

Earth is the only known planet with air and water, so we can live here. Most of it is covered with water; the rest is land. The Earth **rotates** on its axis – that causes day and night.

Landform	What it is
🌾 Plain	flat, smooth land; most crops grow here
⛰️ Hill	land higher than around it; apples, cherries, plums grow
🏔️ Mountain	very high hill; tops may have snow
🏞️ Valley	low land between hills or mountains
🏜️ Desert	sandy land, very hot, little rain
🌲 Forest	plants growing close; wild animals live here

Land pollution

Waste from houses, factories and agriculture dumped on land makes it dirty and makes us sick. **Stop it:** grow more plants, dispose of waste properly (dry and wet dustbins).

🔤 Word Master

Word	Meaning
spaceship	vehicle that travels to space
polluted	made dirty
planet	a large body moving around the Sun
rotate	to spin

Exercise 15.1: Fill in the blanks

Use: Moon, heat, clouds, rocket.

1. The Sun gives us _____ and light.
2. The shape of the _____ keeps changing.

3. A _____ takes a spaceship to the Moon.

4. It rains when there are dark _____.

Exercise 15.2: Unscramble the planets

1. MREYCUR **2.** ENUVS **3.** THEAR **4.** SMAR

5. JPIUETR **6.** TARSUN **7.** UNARUS **8.** PTUNEEN

Exercise 15.3: Choose the correct option

1. When the Moon is like a ball it is a: full moon / new moon

2. A band of seven colours: cloud / rainbow

3. Plants grow very close together in: plain / valley / forest

Exercise 15.4: Who am I?

1. I am a big ball of fire. All living things need me.

2. We twinkle every night. You cannot count us.

3. You see me at night; my shape changes.

4. I am land covered with sand.

Exercise 15.5: Answer the questions

1. Why do stars look small?

2. What is a new moon?

3. What is a cloud?

4. What is common among the Sun, Moon and stars?

5. Why keep land pollution-free?

🔑 Answer key – Chapter 15: Our Universe

Exercise 15.1: Fill in the blanks

1. heat • **2.** Moon • **3.** rocket • **4.** clouds

Exercise 15.2: Unscramble the planets

1. Mercury • **2.** Venus • **3.** Earth • **4.** Mars • **5.** Jupiter • **6.** Saturn • **7.** Uranus • **8.** Neptune

Exercise 15.3: Choose the correct option

1. full moon • **2.** rainbow • **3.** forest

Exercise 15.4: Who am I?

1. Sun • **2.** stars • **3.** Moon • **4.** desert

Exercise 15.5: Answer the questions

1. they are very far away • **2.** when we cannot see the Moon • **3.** a ball of water drops floating in the sky • **4.** all are in the sky and give light • **5.** so we and the plants and animals stay healthy
