How to use this book. One chapter at a time (about 20–25 minutes). 1) Read the "learn" part aloud together. 2) Do the ✏️ example with the child. 3) Let the child do the exercises alone — never rush. 4) Check with the 🔑 answer key at the end of each chapter. Mistakes are good: ask "show me how you thought". Suggested pace: 1 chapter per week, then Revision Tests.

CHAPTER 1

Numbers 1 to 100

🎯 **In this chapter I will learn:**

- digits, numbers and number names
- count forward and backward up to 100
- find numbers before, after and between
- skip count by 2s, 5s and 10s
- tell even and odd numbers

Digits, numbers and numerals

A **digit** is one little symbol. There are only **10 digits**: **0 1 2 3 4 5 6 7 8 9**. We join digits to make bigger **numbers**. The way we write a number with digits (like **47**) is its **numeral**.

Digit	Number with one digit	Number with two digits
7	7	73
4	4	48
9	9	95

⭐ **Remember** Counting numbers go: 1, 2, 3 … 10, 11, 12 … 99, 100. Every number has a place in the line and a name!

The hundred chart

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

🤓 **Parent / Teacher tip:** Point to a number and ask: "What is one more? One less? What is 10 more?" Moving down one row always adds 10.

Number names

0–9	10–19	Tens
0 zero, 1 one, 2 two, 3 three, 4 four, 5 five, 6 six, 7 seven, 8 eight, 9 nine	10 ten, 11 eleven, 12 twelve, 13 thirteen, 14 fourteen, 15 fifteen, 16 sixteen, 17 seventeen, 18 eighteen, 19 nineteen	20 twenty, 30 thirty, 40 forty, 50 fifty, 60 sixty, 70 seventy, 80 eighty, 90 ninety, 100 one hundred

To write a number name like **47**: say the tens word, then the ones word → **forty seven**.

Before, after, between

The number just **before** 8 is 7 (one less). The number just **after** 8 is 9 (one more). The number **between** 7 and 9 is 8.

Skip counting

Instead of counting 1 by 1, we can **jump**. Jumps of 2: 2, 4, 6, 8, 10. Jumps of 5: 5, 10, 15, 20. Jumps of 10: 10, 20, 30, 40.

Even and odd numbers

Make pairs. If nobody is left alone the number is **even** (2, 4, 6, 8, 10). If one is left out it is **odd** (1, 3, 5, 7, 9).

6 → 👧👧 👧👧 👧👧 **even** 7 → 👧👧 👧👧 👧👧 👧 **odd**

⭐ **Remember** Look at the **ones digit**: 0, 2, 4, 6, 8 → even. 1, 3, 5, 7, 9 → odd.

CHAPTER 2

Place Value: Tens and Ones

🎯 **In this chapter I will learn:**

- make a group of ten
- say how many tens and ones are in a number
- write numbers in expanded form (40 + 5)
- build a number from tens and ones

Ten ones make one ten

When we have 10 loose sticks, we tie them into **one bundle** – that is **1 ten**. The sticks left over are the **ones**.

26  = 2 tens + 6 ones = **20 + 6**

43  = 4 tens + 3 ones = **40 + 3**

Number	Tens (T)	Ones (O)	Expanded form
14	1	4	10 + 4
35	3	5	30 + 5
60	6	0	60 + 0
99	9	9	90 + 9

⭐ **Remember** In **47**: the 4 is in the **tens** place (it means 40). The 7 is in the **ones** place (it means 7). The **place value** of 4 is 40, of 7 is 7.

👩‍🏫 **Parent / Teacher tip:** Use real bundles of ice-cream sticks or straws with rubber bands. Let the child make 2-digit numbers physically before writing them.

CHAPTER 3

Comparing and Ordering

🎯 **In this chapter I will learn:**

- say which number is bigger or smaller
- use the signs >, < and =
- arrange numbers in ascending and descending order
- make the biggest and smallest number from digits

Which is more?

First look at the **tens**. The number with more tens is bigger. If tens are the same, look at the **ones**.

47 and **39**: tens 4 > 3, so **47 > 39**.

52 and **58**: tens same (5), ones 2 < 8, so **52 < 58**.

⭐ **Remember** The hungry crocodile 🐊 always opens its mouth to eat the **bigger** number. **>** greater than **<** less than **=** equal to

Ascending and descending

Ascending = going up 🪜 smallest → biggest: 12, 25, 40, 71.
Descending = going down 🛝 biggest → smallest: 71, 40, 25, 12.

CHAPTER 4

Ordinal Numbers

🎯 **In this chapter I will learn:**

- tell the difference between counting and position numbers
- read and write 1st to 10th
- use first, second, third… for position of people, things, days and months

Counting numbers and position numbers

Cardinal numbers tell *how many*: 1, 2, 3 …
Ordinal numbers tell the *position* or rank: 1st, 2nd, 3rd …

1st	2nd	3rd	4th	5th	6th	7th	8th	9th	10th
first	second	third	fourth	fifth	sixth	seventh	eighth	ninth	tenth

Ben Bear is **1st**, Ernie Elephant **2nd**, Charlie Chick **3rd**, Abe Ape **4th**, Tom Tortoise **5th**, Rabbit **6th**.

⭐ **Remember** Ordinals ending: 1**st**, 2**nd**, 3**rd**, then **th** for 4th to 10th.

Days and months have positions too

Monday is the **1st** day of the week, Tuesday the **2nd** … Sunday the **7th**. January is the **1st** month, February the **2nd** …

Exercise 4.1: Days of the week

Start with Monday as the 1st day. Write the day.

1. _____ is the 1st day of the week.
2. _____ is the 2nd day of the week.
3. _____ is the 3rd day of the week.
4. _____ is the 4th day of the week.
5. _____ is the 5th day of the week.
6. _____ is the 6th day of the week.

7. _____ is the 7th day of the week.

Exercise 4.2: The animal race

Ben Bear came first, Ernie Elephant second, Charlie Chick third, Abe Ape fourth.

CHAPTER 5

Addition

🎯 **In this chapter I will learn:**

- join groups to find the total (sum)
- know number bonds up to 10
- add 1-digit and 2-digit numbers
- know that order does not change the sum
- add three small numbers

Putting things together

Addition means joining two or more groups to find **how many in all**. We use the sign **+** (plus). The numbers we add are **addends**. The answer is the **sum**.

🍎🍎🍎 + 🍎🍎 = 🍎🍎🍎🍎🍎 **3 + 2 = 5**

Count on: start at **3**, hop **2** more → **5**.

Number bonds

Two numbers that join to make a number are a **number bond**. Number bonds of 5: 0+5, 1+4, 2+3, 3+2, 4+1, 5+0.

Bonds of 10					
0+10	1+9	2+8	3+7	4+6	5+5

Adding 2-digit numbers

Add the **ones** first, then the **tens**.

	T	O
	2	**4**
+		**3**

4 + 3 = 7 ones, 2 tens stay 2 → **27**

☆ **Remember** Order does not matter: **5 + 3 = 3 + 5 = 8**. And adding 0 changes nothing: 9 + 0 = 9.

Exercise 5.1: Number bonds

Write the missing number.

1. 2 + _____ = 5 **2.** 4 + _____ = 5 **3.** 3 + _____ = 7

Exercise 5.3: Count on 2, 5 and 10

Mental maths.

1. 22 + 2 = _____ **2.** 48 + 2 = _____ **3.** 34 + 2 = _____ **4.** 18 + 2 = _____ **5.** 15 + 5 = _____

6. 35 + 5 = _____ **7.** 95 + 5 = _____ **8.** 20 + 10 = _____ **9.** 45 + 10 = _____ **10.** 68 + 10 = _____

4. ●●●●●●●○○○ → 7 + _____ = 10

5. ●●●●●●●●●○ → 9 + _____ = 10

🐵 **Parent / Teacher tip:** Use a ten-frame or 10 buttons. Cover some and ask "how many are hiding?" – this builds number bonds fast.

CHAPTER 6

Subtraction

🎯 **In this chapter I will learn:**

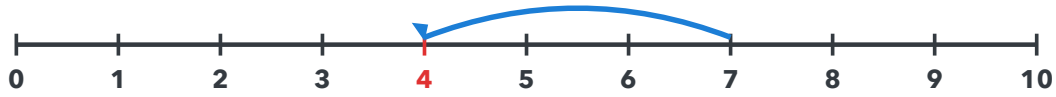

- take away objects and find what is left
- find the difference between two groups
- subtract 0 and subtract a number from itself
- subtract 1-digit from 2-digit numbers

Taking away

Subtraction means taking some away, or finding how many more or less. The sign is **−** (minus). The big number we start with is the **minuend**, the one we take away is the **subtrahend**, the answer is the **difference**.

🍪🍪🍪🍪🍪🍪🍪 − ❌❌❌ **7 − 3 = 4**

Cross out 3 cookies. 4 are left.

Count back: start at **7**, hop back **3** → **4**.

⭐ **Remember** Any number − 0 = the same number (9 − 0 = 9). Any number − itself = 0 (6 − 6 = 0).

How many fewer? (difference)

Picture A has 9 books, picture B has 5. How many fewer? **9 − 5 = 4**.

Subtracting 2-digit numbers

Subtract the **ones** first, then the **tens**.

	T	O
	4	**8**
−	**2**	**5**

8 − 5 = 3 ones, 4 − 2 = 2 tens → **23**

Exercise 6.1: Cross out and subtract

CHAPTER 7

Add and Subtract Together

🎯 **In this chapter I will learn:**

- see that addition and subtraction are partners
- make a fact family from three numbers
- do quick mental maths with 2, 5 and 10
- choose + or − correctly

Fact families

Three numbers can make **two additions** and **two subtractions**. Take the family **3, 4, 7**:

3 + 4 = 7	4 + 3 = 7	7 − 3 = 4	7 − 4 = 3
+	+	−	−

⭐ **Remember** The **biggest** number is the one we start with in subtraction and the one we **get** in addition.

Mental maths

Adding or subtracting **10** only changes the **tens** digit: 45 + 10 = 55, 45 − 10 = 35.

Times Tables

🎯 **In this chapter I will learn:**

- understand multiplication as repeated addition
- say tables of 2, 3, 4, 5, 6, 7, 8, 9 and 10
- find "n times a number"

Repeated addition

3 plates with 2 cakes each: 2 + 2 + 2 = 6. We write **3 × 2 = 6** and say **"3 times 2 is 6"**.

⭐ **Remember** A **times table** is just a number added again and again: 5, 10, 15, 20 … is the table of 5.

Table of 2	Table of 3	Table of 4	Table of 5
2 × 1 = 2	3 × 1 = 3	4 × 1 = 4	5 × 1 = 5
2 × 2 = 4	3 × 2 = 6	4 × 2 = 8	5 × 2 = 10
2 × 3 = 6	3 × 3 = 9	4 × 3 = 12	5 × 3 = 15
2 × 4 = 8	3 × 4 = 12	4 × 4 = 16	5 × 4 = 20
2 × 5 = 10	3 × 5 = 15	4 × 5 = 20	5 × 5 = 25
2 × 6 = 12	3 × 6 = 18	4 × 6 = 24	5 × 6 = 30
2 × 7 = 14	3 × 7 = 21	4 × 7 = 28	5 × 7 = 35
2 × 8 = 16	3 × 8 = 24	4 × 8 = 32	5 × 8 = 40
2 × 9 = 18	3 × 9 = 27	4 × 9 = 36	5 × 9 = 45
2 × 10 = 20	3 × 10 = 30	4 × 10 = 40	5 × 10 = 50

Table of 6	Table of 7	Table of 8	Table of 9
6 × 1 = 6	7 × 1 = 7	8 × 1 = 8	9 × 1 = 9
6 × 2 = 12	7 × 2 = 14	8 × 2 = 16	9 × 2 = 18
6 × 3 = 18	7 × 3 = 21	8 × 3 = 24	9 × 3 = 27
6 × 4 = 24	7 × 4 = 28	8 × 4 = 32	9 × 4 = 36
6 × 5 = 30	7 × 5 = 35	8 × 5 = 40	9 × 5 = 45
6 × 6 = 36	7 × 6 = 42	8 × 6 = 48	9 × 6 = 54
6 × 7 = 42	7 × 7 = 49	8 × 7 = 56	9 × 7 = 63
6 × 8 = 48	7 × 8 = 56	8 × 8 = 64	9 × 8 = 72
6 × 9 = 54	7 × 9 = 63	8 × 9 = 72	9 × 9 = 81
6 × 10 = 60	7 × 10 = 70	8 × 10 = 80	9 × 10 = 90

Table of 10: 10, 20, 30, 40, 50, 60, 70, 80, 90, 100.

Parent / Teacher tip: Say tables as a rhythm. Learn 2, 5, 10 first, then 3, 4, then 6–9. Tables of 9: the tens digit goes up, the ones digit goes down!

Measurement

🎯 **In this chapter I will learn:**

- compare length, height, weight and capacity
- measure with hand spans, foot spans and crayons
- order things from shortest to longest

Comparing things

We say	Words	Example
Length	long / longer / longest, short / shorter / shortest	pencil vs. crayon
Height	tall / taller / tallest	giraffe 🦒 vs. rabbit 🐇
Thickness	thick / thicker, thin / thinner	a dictionary vs. a notebook
Weight	heavy / heavier, light / lighter	elephant 🐘 vs. feather 🪶
Capacity	full, half, empty, holds more / less	a bucket vs. a cup

Measuring with non-standard units

We can measure with our **hand span** 🖐, **foot span** 🦶 or **crayons** 🖍. Put them end to end, with no gaps, and count.

⭐ **Remember** Use the **same unit** to compare. My hand is bigger than yours, so we must both use the same crayon!

Exercise 11.1: Choose

Circle (write) the right word.

1. Elephant or ant – which is heavier? _____

5. Dictionary or notebook – which is thicker? _____
6. Feather or stone – which is lighter? _____

Exercise 11.2: Order them

Write the order.

1. Shortest to longest: ✏️ (5 cm), 📏 (30 cm), 🖍️ (9 cm) → _____
